

## Synthesis, characterization and biological testing of highly active tungsten and molybdenum anticancer agents

A Position for a Masters Student at the Department of Inorganic Chemistry - in a dedicated team of scientists is vacant.

**Duration:** 6 months full-time lab work

### Job Description:

Contribution to research in inorganic synthesis chemistry; in particular synthesis and characterization of potential anticancer agents (tungsten and molybdenum complexes) and the biological testing thereof.

### Profile:

Graduation with Bachelor in Chemistry. Experience in inorganic synthesis, especially Schlenk techniques is preferred. Excellent command of written and spoken English is a must.

### Languages:

Language	Language level	Importance
German	Very good knowledge	MUST
English	Very good knowledge	MUST

### Application Deadline:

March 15, 2021

Applications including a short letter of motivation (German or English) should be submitted to [michael.malarek@univie.ac.at](mailto:michael.malarek@univie.ac.at)

For further information please contact Michael Malarek. +43-664-60277-52670.

The University pursues a non-discriminatory employment policy and values equal opportunities, as well as diversity (<http://diversity.univie.ac.at/>). The University lays special emphasis on increasing the number of women in senior and in academic positions. Given equal qualifications, preference will be given to female applicants.
